Conservation

Pheasants Forever and Quail Forever are dedicated to the conservation of pheasants, quail and other wildlife through habitat improvements, public awareness, education and land management policies and programs.

Pheasants Forever and Quail Forever leaders strive to make every acre count on the landscape. Local biologists design cost effective mixtures with pheasants, quail and pollinators in mind. Where and when appropriate seed mixes will be designed using the following criteria to meet the organization's High-Quality Habitat Standard:

1. A minimum of 50 percent of the seed mixture will be comprised of wildflowers and forbs.
2. Each seeding mixture will contain 40 or more species to provide high diversity and benefits.
3. Each seeding mixture will contain at least one appropriate milkweed species to benefit monarch butterflies.
4. An appropriate number of flowering plants will be provided throughout the entire growing season.
5. Seeding mixtures are designed using the appropriate seeds per square foot for each species.

For more information or for help developing a seed mix, please contact your local PF/QF wildlife biologist or visit www.PheasantsForever.org
